

**Glue may be better than stitches, staples or adhesive tape for simple cuts**

**Clinical question** What is the best way to repair traumatic skin lacerations in children and adults?

**Bottom line** Pain scores and procedure time significantly favoured tissue adhesives over standard wound care (stitches, staples or adhesive tape). There was no significant difference in cosmetic appearance between tissue adhesive and standard wound care on either a Cosmetic Visual Analogue Scale or Wound Evaluation Score.

**Caveat** There were small but statistically significant risk differences for dehiscence (favouring standard wound care, NNH 25\*) and erythema (favouring tissue adhesives, NNH10). Although there are a few different types of glue available (based on butylcyanoacrylate and octylcyanoacrylate), no one glue seems to be superior.

\* NNH = number needed to treat to cause harm in one individual.

**Context** Lacerations need to be closed to ensure proper healing and to prevent infection or unattractive scarring. This is the first systematic review comparing glue with standard wound closure.

**Cochrane Systematic Review** Farion K et al. Tissue adhesives for traumatic lacerations in children and adults. Cochrane Database of Systematic Reviews 2001, Issue 4. Article No. CD003326. DOI: 10.1002/14651858.CD003326.

*Note: This review contains 10 studies involving 522 participants.*

PEARLS No. 11, August 2007, written by Brian R McAvoy

PEARLS are succinct summaries of Cochrane Systematic Reviews for primary care practitioners – developed by the Cochrane Primary Care Field, New Zealand Branch of the Australasian Cochrane Centre at the Department of General Practice and Primary Health Care, University of Auckland and funded by the New Zealand Guidelines Group. New Zealanders can access the Cochrane Library free via [www.nzgg.org.nz](http://www.nzgg.org.nz)

PEARLS provide guidance on whether a treatment is effective or ineffective. PEARLS are prepared as an educational resource and do not replace clinician judgement in the management of individual cases. View PEARLS online at: [www.nzdoctor.co.nz](http://www.nzdoctor.co.nz); [www.nzgg.org.nz](http://www.nzgg.org.nz); [www.cochraneprimarycare.org](http://www.cochraneprimarycare.org)
